

WHOLE HOUSE PRE-FILTER

Universal version

Whole house deep water purification

First barrier to home filtration

No core change

Antifreeze
at minus 30 °C

Flush timing

Water pressure
detection

316 strainer

360 ° scrub

High pressure
backwash

Large Flow

360° UNIVERSAL ROTATION INSTALLATION

Unconstrained by conditions, applicable to
a variety of complex pipelines, not critical, less effort

PATENTED TECHNOLOGY WATER PRESSURE DETECTION

Equipped with a precision pressure gauge to monitor the water pressure throughout the entire 24-hour period.

Visual display of actual water pressure

FILTER BOTTLE USING IMPORTED MATERIALS

The filter bottle is made of imported materials and can withstand freezing test at $-30\text{ }^{\circ}\text{C}$. The blasting force is more than 60 kg, the water hammer is 12 kg and more than 150,000 times, and the pipeline is standard.

PRODUCT SPECIFICATIONS

Product model: P3

Filtering accuracy: 40 μ m

Effluent flow: 3T/h

Product size: 290*160mm

Work pressure: 0.1~0.8MPa

Applicable temperature: -30°C-100 °C

Connector size: 4/6", 1"

Filter material: SuS316L stainless steel mesh
